

Qualifying IRA energy communities

(a) Qualifying energy communities for 2023.

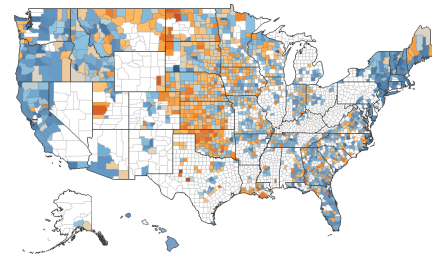

Notes: In (a), colored areas represent those allocated energy community status for 2023 by the U.S. Department of Treasury and Internal Revenue Service under the Inflation Reduction Act. Shaded areas represent those that qualify under the fossil fuel employment criterion (grey) or the coal closure criterion (red). Brownfield sites indicate point locations rather than areas. In (b) and (c), counties are deemed to contain an energy community if any area of the county overlaps with some area of an energy community (excluding brownfield sites), and measure overall county ECF against the national logarithmic average on the same color scale.

Qualifying counties

(b) ECFs for counties containing energy communities.

Non-qualifying counties

(c) ECFs for counties that do not contain energy communities
