Overall employment carbon footprints, by county

Employment carbon footprint (metric tonnes CO2e per employee)										
1.5 (min)	5.5	19 (mean)	66	230	780	2,000 (max)				
367 (min)	1,270	4,400 (mean)	15,200	52,500	182,000	463,000 (max)				
	Soc	ial cost per em	ployee (U	SD per emp	loyee)					

(a) Distribution of overall ECFs across counties.

Overall employment carbon footprints, by state

Employment carbon footprint (metric tonnes CO2e per employee)									
2.2 (min)	5.5	14 (mean)	34	86	210				
517 (min)	1,270	3,180 (mean)	7,950	19,900	50,000				
	Social	cost per employee (USD per emp	olovee)					

(b) Distribution of overall ECFs across states.

Notes: Regions in orange have ECFs above the national logarithmic average while those in blue have ECFs below the national logarithmic average. To derive state-level ECFs, county-level employment and effective $\rm CO_2e$ emissions values were aggregating by state.
